

# Exotic nuclei: on the edge of existence

*Free IOP talk at the University of Leeds*

**Dr Marina Petri (University of York)**

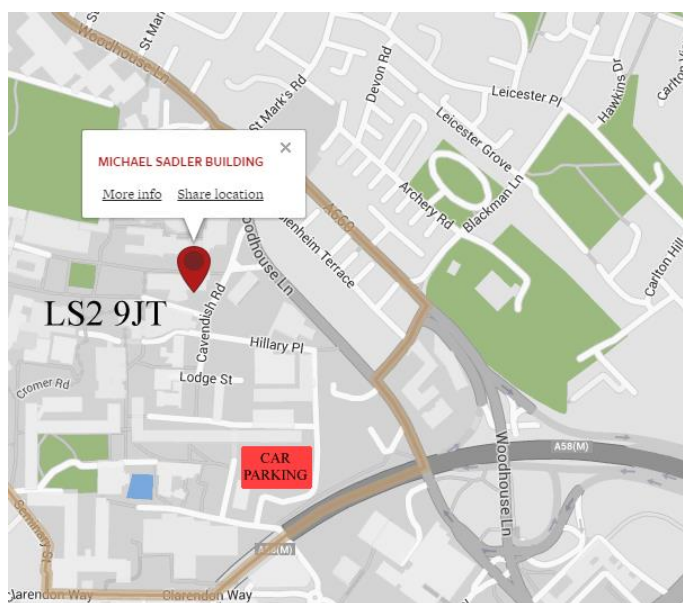

**7.00 pm Wednesday 27<sup>th</sup> March 2019**

**Free tea, coffee and biscuits from 6:30pm**

**University of Leeds, Michael Sadler Building, Rupert Beckett Lecture Theatre**

In the laboratory, physicists can create atomic nuclei which we haven't otherwise observed in nature, challenging our understanding of the fundamental fabric of the universe. In this talk I will discuss the role of exotic nuclei in our understanding of nature and I will highlight the exciting research currently undertaken in Nuclear Physics.
